

00 SAGAR INFRASTRUCTURE SIGNAL

Public signals are not the same as readiness.

We turn public project announcements, regulatory records and technical documents into a decision boundary: what the record supports, what it cannot support and what evidence should come next.

CYCLE_013 • READ-ONLY PUBLIC SCREENING • HUMAN APPROVAL REQUIRED

NO FALSE CERTAINTY

Bring us a decision →

01 THE SIGNAL

The public record can justify the next question.

CYCLE_013 screened public primary sources around the Christopher M. Crane Clean Energy Center. The result is commercially useful because it does not pretend the record says more than it does.

[VERIFIED] DECISION

[PUBLIC SIGNAL]

A proposed restart is a process, not an operating fact.

The NRC records licensing, inspection and environmental-review steps. The corporate

Ask for a

bounded

technical and

regulatory data

room.

Public sources support a limited request for additional evidence. They do not support approval, firm MW, energization or electrical viability.

announcement records a PPA and an expected date

[UNKNOWN]

The decision-changing

documents are still

missing.

Interconnection, firm delivery, energization, network works and binding water evidence remain open.

02

GATE

LEDGER

No gate is allowed to hide behind a

headline.

Every public claim is kept at its source boundary. If a document does not prove the gate, the gate stays open.

GATE

STATUS

NEXT PROOF

 SAGAR LABS ON BETA	NO SUPPORT	Agreement, approved study, point of connection and delivery conditions.
UTILITY CAPACITY	NO SUPPORT	Firm deliverable MW record, conditions, period and authority.
GRID IMPLEMENTATION	NO SUPPORT	Approved works scope, responsibilities and dependencies.
SCHEDULE	SUPPORT LIMITED	Process chronology only; 2028 remains a corporate expectation.
WATER	NO SUPPORT	Binding allocation, permit or contract for the site and phase.

03 THE METHOD

Signals become useful when their limits stay visible.

This is the reusable communication system: signals → evidence → evaluation → decision → action.

01	02	03
----	----	----

04 INTELLIGENCE BRIEF

A weekly signal should end in a decision question.

This editorial template is ready to reuse across AI infrastructure, power, water, land, permitting, capital and economic development.

Public evidence can open diligence. It cannot close the gate.

01 / SIGNAL

NRC restart process and a corporate announcement with a PPA and expected 2028 date.

02 / WHY IT MATTERS

A public narrative can look investable before the delivery evidence exists.

03 / DECISION AFFECTED

Whether to request a technical and regulatory data room.

04 / UNKNOWN

Interconnection, firm MW, energization, network works and binding water evidence.

✓ 3 actions: request · verify · hold

Request this format →

05 VISUAL KIT

One evidence posture. Five useful surfaces.

SAGAR LABS

BETA

The same signal can become a buyer-facing brief, a LinkedIn card, an email, a web article or a lead magnet without changing its truth boundary.

SAGAR / INFRASTRUCTURE SIGNAL

PUBLIC SCREENING

A headline is not a gate.

Public evidence supported a bounded data-room request. Advance eligibility stayed: NO.
